

DESCRIPTION:

Those plan drawings are a SIMPLIFIED version of the actual look of the building. The property is medieval and has far from straight and perpendicular walls, but we have done our best to measure it, and draw it up, as good as possible. We present this to make it easier to understand the house, but it should be "read" together with attached photos and text descriptions, and most important is that you visit this medieval gem in real life and experience it for yourself.
