

**I.T.B. I VOLUMI SONO STATI CALCOLATI ALL'INTRABORDO DI  
OGNI SOLETTA.**

L'AREA DI PROPRIETÀ E' STATA RILEVATA CON TOSSELITE ELETTRONICO GEODINETER GIOVANNINI 408 (precisione di misurazione Mikasa +/- 5 mm. parti per milione, angoli 0.50 mgon -012°)

**FABBRICATI DEVOLUTI CON PRETETTO DALLA "B.I.L." DEL 6/80/2404 PROT. 4795 IL CUI VOLUME SI RECUPERERA' IN CASO DI RICHIESTA DI PERMESSO DI COSTRUIRE PER EVENTUALI AMPLIAMENTI.**

**FABBRICATO CROLLATO A SEGUITO DEL FENOMENO STATO DI CONCRETO E DEGRADO.**

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
